

Building for Life 12

Building for Life is the industry standard, endorsed by the Government, for well-designed homes and neighbourhoods that local communities, local authorities and developers are invited to use to stimulate conversations about creating good places.

Barratt Homes is committed to ensure all their schemes meet Building for Life 12 (BfL12). BfL12 is based on the new National Planning Policy Framework and the Government's commitment to building more homes, better homes and involve local communities in planning. The 12 questions are designed to help structure discussions between local communities, the local planning authority, the developer of a proposed scheme and other stakeholders. BfL12 is also designed to help local planning authorities assess the quality of proposed and completed developments.

We are committed to ensuring that the scheme is designed to meet the BfL12 status and achieves the 'Built for Life' Kite Mark.

Simpler, easier and better

Each headline question is followed by a series of additional questions that we suggest are useful to ask at the start of the design process. We've also provided five recommendations for how you might respond with the aim of offering a range of responses.

Recommendations are designed to stimulate discussion with local communities, the project team, the local authority and other stakeholders to help you find the right solution locally.

We've travelled the country visiting hundreds of residential developments. During these visits, we found common problems. Our avoidance tips help you avoid these pitfalls. We also discovered many well-designed developments, their qualities have been captured in our recommendations.

Finally, we've added endnotes providing further detail, clarity and where appropriate, references that you may find useful.

Integrating into the neighbourhood

1 Connections

Does the scheme integrate into its surroundings by reinforcing existing connections and creating new ones, while also respecting existing buildings and land uses around the development site?

2 Facilities and services

Does the development provide (or is it close to) community facilities, such as shops, schools, workplaces, parks, play areas, pubs or cafes?

3 Public transport

Does the scheme have good access to public transport to help reduce car dependency?

4 Meeting local housing requirements

Does the development have a mix of housing types and tenures that suit local requirements?

Creating a place

5 Character

Does the scheme create a place with a locally inspired or otherwise distinctive character?

6 Working with the site and its context

Does the scheme take advantage of existing topography, landscape features (including water courses), wildlife habitats, existing buildings, site orientation and microclimates?

7 Creating well defined streets and spaces

Are buildings designed and positioned with landscaping to define and enhance streets and spaces and are buildings designed to turn street corners well?

8 Easy to find your way around

Is the scheme designed to make it easy to find your way around?

Street & home

9 Streets for all

Are streets designed in a way that encourage low vehicle speeds and allow them to function as social spaces?

10 Car parking

Is resident and visitor parking sufficient and well integrated so that it does not dominate the street?

11 Public and private spaces

Will public and private spaces be clearly defined and designed to be attractive, well managed and safe?

12 External storage and amenity space

Is there adequate external storage space for bins and recycling as well as vehicles and cycles?
